WIN-WIN COOPERATION AND INNOVATION

Company culture

CULTURAL

Business objectives:

Provide high-quality carbon products to serve global users

Quality policy:

Persist in creating exquisite products and always pursue satisfaction

Business philosophy:

honesty-based, quality first, pioneering and innovative, create better future

Service Commitment:

For your satisfaction, we will make 100% effort

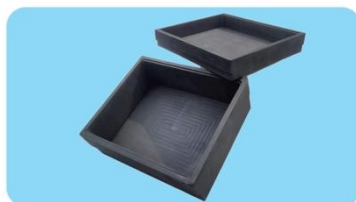

Company Introduction

Qingdao Shengkaiweijian Graphite Products Co., Ltd. was established in 2005, located in Laixi, Qingdao, Shandong Province. It is mainly engaged in carbon and carbon products: Graphite box, 3D hot bending graphite die, oxygen-free copper rod up-casting mold, graphite mold for copper pipes, EDM graphite mold, horizontal continuous casting large-scale copper mold, electronic sintering mold, graphite protective cup, insulation sleeve, horizontal continuous casting copper pipe/bar/rods, and special-shaped graphite molds, horizontal continuous casting graphite sleeve, semi-continuous casting graphite channel/tube/stopper/base/nozzle, mechanical seal carbon ring/gasket/paper, single crystal furnace heater, insulation screen, graphite crucible/boat/funnel, flake graphite and other related businesses. The enterprise has strong strength, strong technical strength, and strict production quality control. Our company use the high-tech coating treatment to improve the hardness, wear resistance, and oxidation resistance of the molds, which extends the service life of the molds by 3-5 times. At the same time, we adhere to the business policy of honesty, the quality of products operated by reliable, Reasonable prices, fast delivery. Our company's products with excellent performance, perfect after-sales service system, by the vast Numbers of users. Products exported to Italy, Mexico, Brazil, India, Argentina, Australia and other more than 20 countries. We sincerely welcome customers to visit our factory for inspection, guidance and business negotiations.

▶ Product Introduction

Various specifications of graphite box/sagger/crucible for lithium battery material sintering.

Graphite Box

Graphite Box

Graphite Box

Graphite Box

Graphite Box

Graphite Box

Product advantage

1. Reasonable design, high purity, good air permeability, fast volatilization of impurities.
2. Good chemical corrosion resistance and impact, to ensure the reliability of product quality.
3. Good strong acid resistance/strong alkali, can be competent for various harsh high-temperature environments. It is the preferred product for high-end graphite industry.
4. Sintered finished product rate is high, less pollution, is adopted by many domestic new energy material enterprises, the performance with high value.
5. Resistance of high-temperature, anti-oxidation, high density and other characteristics.
6. Long service life, high temperature resistance, can be used for many times.

Graphite Box

Graphite Box

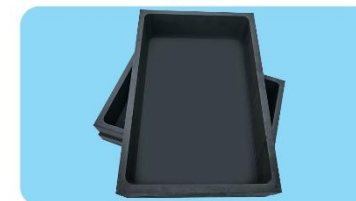

Graphite Box

Graphite Box

Graphite Box

Graphite Box

Using high purity graphite / medium coarse graphite as the raw material, the graphite box has the characteristics of high temperature resistance, oxidation resistance, high density, etc. It can be competent for various harsh high-temperature use environments. The size can be customized according to customer requirements.

▶ Graphite product

3D hot bending graphite mold

3D hot bending graphite mold advantage

- 1.It can improve the surface finish of the glass;
- 2.No infiltrating glass;
- 3.Reduce the glass stress, and reduce overheating and cracking;
- 4.Extend the use- life of the mold;
- 5.Have balanced antioxidant properties;
- 6.Improve cutting performance;
- 7.Reduce loss and improve corrosion resistance.

▶ Graphite product

Horizontal continuous casting graphite mold

▶ Graphite product

Oxygen-free copper rod graphite die for up-casting

▶ Graphite product

Graphite tube, graphite channel, graphite nozzle, graphite base, graphite plugs for copper industry

▶ Graphite product

Flat mold for copper strip production

▶ Graphite product

Horizontal continuous casting graphite mold, graphite sleeve

▶ Graphite product

Graphite rotor for aluminum

▶ Graphite product

Graphite crucible

▶ Graphite product

Flake graphite(3299/5099 etc,various specifications)

▶ Graphite product

Graphite ring, graphite gasket/sheet, graphite paper

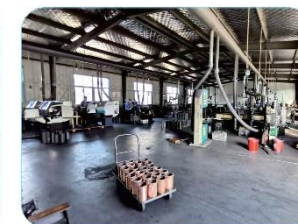

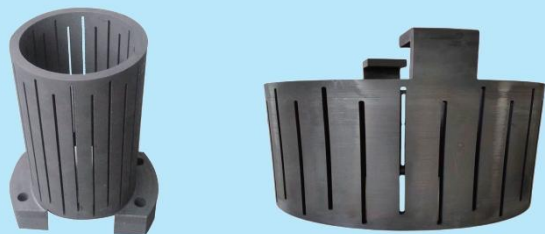

▶ Graphite product

Graphite block/rods

▶ Graphite product

Graphite heater

Advanced production equipment

We have advanced production lines, standardized and systematic management of production. We have machining center, CNC lathe, CNC milling machine, planer, sawing machine, grinder, drilling machine, professional manufacturing pyrolytic graphite and other equipment, and can process various graphite products according to customers' requirements. We also have advanced production, testing and laboratory equipment, to ensure that the quality of every product of our factory test qualified.

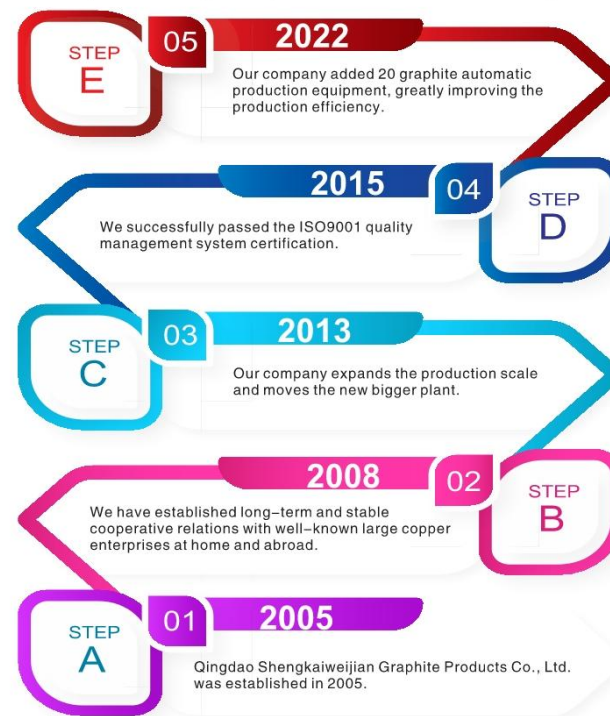

发展历程

▶ Development history

QINGDAO SHENGKAIWEIJIAN GRAPHITE PRODUCTS CO.,LTD.

Our company firmly based on scientific and technological innovation, devoted to product technology research and development, pay attention to the product quality and honest service, in the continuous product research and development practice has accumulated rich experience in product design and profound theoretical knowledge.

Strong after-sales service system

We have numbers of invention patents and experienced after-sales service team, with the first-class design, exquisite manufacturing and perfect after-sales service, we had won the majority of customers' praise.
